CRG Chemo Administration Kit

To ensure price continuity, CRG Healthcare (a division of Clean Room Garments Pty Ltd), has updated the Chemo Admin Spill Kit. This is to include a new light-weight disposable barrier gown and a new P2 flat fold respirator mask. The new gown has successfully undergone tests against cytotoxic drugs (data available from CRG).

CRG's commitment to patient and employee safety is demonstrated through the addition of on-line training for the handling of Hazardous Drugs, such as Cytotoxics, at www.crghealthcare.com.au.

On-line accreditation makes a great addition to any training program. Upon successful completion of the on-line tests, certificates will be issued to each participant.

You receive these added benefits for no extra cost! Visit our website or contact CRG Healthcare for further information.

Contents:
